Projects

HOSPITAL MANAGEMENT
Development of project using C++ language

- Developed a hospital management system in C++ that can handle various tasks such as patient records, staff details, appointments, etc.
- Implemented object-oriented programming concepts such as classes, constructors and file handling to create and manipulate data structures for patients and staff members.

SHOPPING STORE
Development of project using HTML, CSS, JS and Bootstrap

- Created a responsive e-commerce website that allows users to browse, search, and purchase products from various categories.
- Implemented features such as product listing, filtering, sorting, cart, and order confirmation using JS and Bootstrap components.
